

LDP and LCP form

Excel Add-in • Install Guide — about 2 minutes

Download the manifest file first

Click the link below and save the file to your computer. You will need it during Step 4.

<https://dilranjankr.github.io/forms/install.html>

The file (manifest.prod.xml) will download automatically. Save it anywhere — Desktop or Downloads is fine.

What you need

- Excel for the web (any laptop, any browser)
- Your Microsoft 365 work account
- The manifest file from above + internet connection

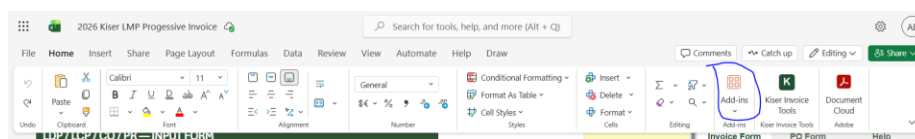

Step-by-step — install in 5 quick steps

Open your invoice workbook in Excel for the web first, then follow these in order.

1

Click Add-ins on the Home tab

Open your workbook in Excel for the web. On the Home tab of the ribbon, click the Add-ins button (small puzzle-piece icon).

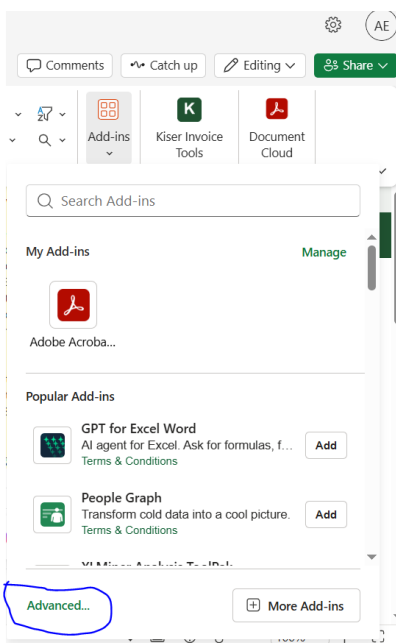

Add-ins button

2

Click Advanced... at the bottom

The Add-ins panel opens. Scroll to the bottom and click the Advanced... link in the bottom-left corner.

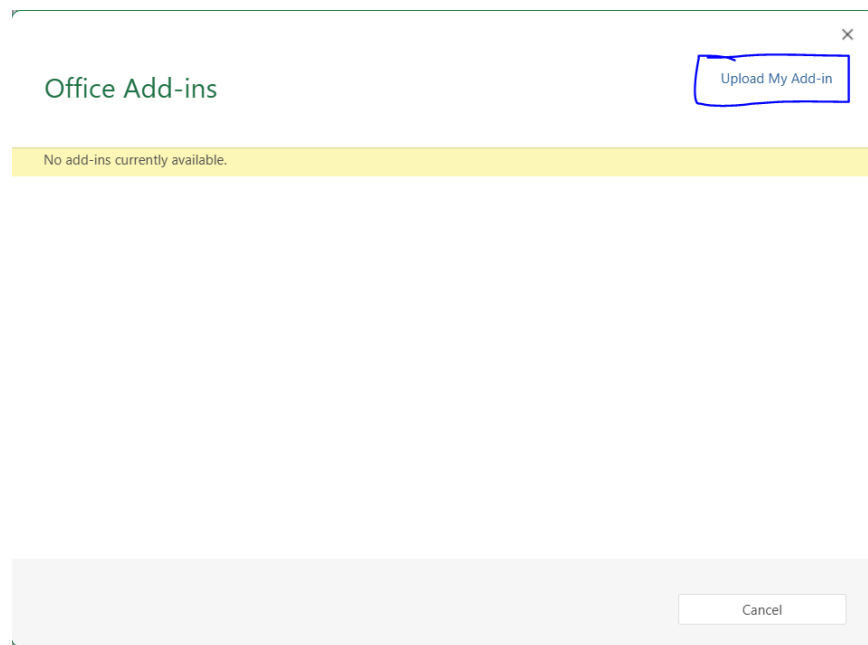

Advanced link

3

Click Upload My Add-in

The Office Add-ins dialog opens. In the top-right corner, click Upload My Add-in.

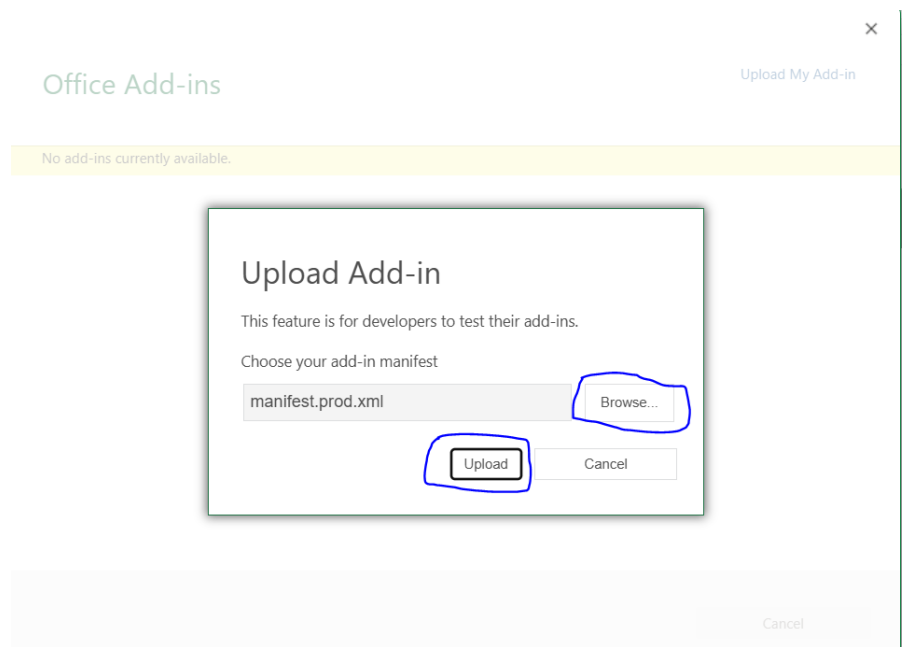

Upload My Add-in

4

Choose the manifest file → Upload

Click Browse, pick the manifest.prod.xml file you saved earlier, then click Upload.

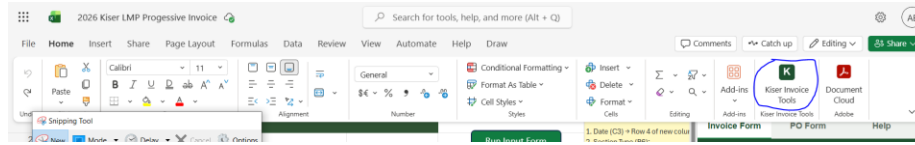

Upload Add-in dialog

5

Click Project Update

A new Project Update button (green K) appears on the Home tab. Click it — the panel opens on the right side of Excel.

Project Update button

You're done

Inside the panel

- LDP and LCP form — add sections, payment requests, generate invoices
- PO form — add and move POs
- Help — rules and tips

Troubleshooting

Panel stuck on 'Loading...'

- Press Ctrl + Shift + R to hard-refresh.
- Close the Excel browser tab and reopen the workbook.

Icons look black / text not styled

- Office cache is stale. Press Windows + R, paste %LOCALAPPDATA%\Microsoft\Office\16.0\Wef, delete everything inside, reopen Excel.

'Upload My Add-in' button is missing

- Old desktop Excel (2016 / 2019) — use Excel for the web (office.com) instead.

Auto-updates — nothing to do

Latest version loads automatically every time you open the panel.
